The local market opened fairly strong, with St. Paul and Union Pacific quotations showing an increasing tendency to believe in a pending deal. No important news on this head developed during the day, and the course of prices in consequence was somewhat erratic, although it is confidently believed that something of importance is pending. Matters have not yet advanced to a point where announcement can soon be

Soon after the opening fears as to the money situation began to exert an influence, and there were predictions of a bad bank statement on Saturday. The point was made, however, that the statement might not reflect true conditions, as it was claimed that large sums of money received from other centers had been desposited with trust companies and would not, therefore, appear in the statement.

The report presented to the Car and Foundry stockholders was received with satisfaction, and brought some good buying of the stock. Notwithstanding the emphatic denials that Tennessee Coal and Ison would be taken into United States Steel, rumors that such may eventually be done are being circulated. Colorado Fuel and Iron interests say they do not seek absorption.
